

Lolly Spiders

These creepy looking spiders are the perfect activity in the run up to Hallowe'en. They are very easy to make and look quite repulsive! And when you've had enough of spiders, you can eat the lolly.

Equipment

Hard candy lolly
Glue stick or hot melt glue gun
Googly eyes
2 black pipe cleaners - 30cm in length
Scissors
Square of black tissue paper - 10cm x 10cm (optional)

Method

1. If you choose to do so, wrap the lolly in black tissue paper, twisting the tissue to keep it in place. Don't cover the lolly stick.
2. Cut the pipe cleaners in half.
3. Put the pipe cleaners flat on the table and place the lolly in the centre of them.
4. Fold the ends of the pipe cleaners from one side over the top of the lolly stick and then do the same with the other side.
5. Spread the pipe cleaners out, and bend the ends over to create the spider legs.
6. Using either a glue stick or a hot melt glue gun, glue the back of the googly eyes and stick them onto the pipe cleaners, where they cross over on the lolly stick.
